

# Google Search

## Advanced Search Engine

**Sensory Learning:** Visual and Read/Write learner.

**Bloom's Digital Taxonomy:** Remembering - basic search Understanding - advanced search.

While there are many other search engines, Google has become the default for most users. This powerful search tool will allow the user to search for images or pages. In its most basic form users enter a search word or words and then execute the search, results are displayed. However, the **Advanced search** allows the user to easily refine the search specifying **date ranges, image sizes, domains, file format** and alike. The advanced search also has easy to use **boolean search** tools to refine and modify searches. The advanced search tool will allow the student of teachers to quickly locate specific information and refine searches.

**Process:** 1. Goto to [www.google.com](http://www.google.com) (this will redirect you to your national google search page). 2. Select Advanced search. 3. Enter keyword or words use Boolean modifier fields to structure search. 4. Run the search and modify to refine to suitable level.

The Advanced search is accessed by clicking the advanced search link on the basic search page. This powerful tool will allow you to quickly refine your search from millions of potential hits to manageable numbers.

Use the form below and your advanced search will appear here

Find web pages that have...

all these words:

this exact wording or phrase:

one or more of these words:  OR

But don't show pages that have...

any of these unwanted words:

Need more tools?

Results per page:

Language:

File type:

Search within a site or domain:

[Date, usage rights, numeric range, and more](#)

Date: (down recent the page is)

Usage rights:

Where your keywords show up:

Region:

Numeric range:  ..

[SafeSearch:](#)  Off  On

The advanced search page allows simple boolean searches, as well as selecting language, file format etc

### A Boolean Search.

These searches use operators like **And Or** and **Not** to refine the search. The Advance search has fields for these in the search page.

# URL

## <http://www.google.com>

### Alternatives:

Some of the alternative search engines are:

[www.ask.com](http://www.ask.com)

[www.live.com](http://www.live.com)

[www.yahoo.com](http://www.yahoo.com)
